

INTRODUCING
PRISMATIC

Introducing **Prismatic**, Arc-Com's newest Wall Surfaces pattern.

Prismatic is a bold geometric printed design comprised of various triangular shapes.

This architecturally inspired pattern was developed from the shape and form of a cut velvet incorporating beveled edges, used to enhance visual dimension and depth, resulting in the physical appearance of an embossed surface.

14 COLORWAYS

The image shows three rolls of wallpaper with a geometric pattern of overlapping triangles. The rolls are arranged diagonally from the bottom left to the top right. The leftmost roll is a dark blue-grey, the middle roll is a light grey, and the rightmost roll is a sage green. The pattern is embossed or woven into the fabric of the wallpaper. A white rectangular box with the text 'LOW VOC'S' is positioned in the upper right corner.

LOW VOC'S

PRINTED WITH WATER-BASED INKS

PRISMATIC

Content	Type II Vinyl
Environmental	Low VOC's Printed with water-based inks Can contribute to LEED IEQ 4.1 Free of ozone-depleting chemicals
Application	Wall Surfaces
