

INTRODUCING  
**SPHERE**

The Arc-Com Design Studio is thrilled to be launching its first printed Silicone pattern **Sphere**.

The digital printing process for **Sphere** utilizes water based, non-toxic inks. The silicone layer locks in and protects the print maintaining all of the high performance qualities of our solid silicone offerings.

**Sphere** employs mid-century modern geometric form to create a well-balanced multicolored layout.

Each colorway begins with an anchor neutral surrounded by accent color combinations that echo current trends in both finishes and flooring.
